Smoke Control's Full Life Cycle Service ensures that at any stage of the project – from design through to commissioning – the only company responsible is Smoke Control.

# 100% QUALITY

The Fibershield - H horizontal fire curtain was invented by Stoebich Brandschutz GmbH in 1999. It is the first and still the only type horizontal fire curtain that offers a complete power fail safe function.

The Fibershield - H horizontal fire curtain is backed by extensive testing above and beyond the basic fire test. Fibershield is a premium product, far outperforming any other.

So why the Fibershield - H ? While others have tried their best to copy this system. They have missed the detail, the important details, that give you value for money and an asset that will last the life of your building with no unexpected or hidden maintenance costs.

## The original and the best;

- Complete system cycle tested for 2,000 maintenance free cycles
- High quality fittings that will last the life of the product
- High quality motors tested to 50,000 fault free cycles
- High quality CE Labelled (third party certified) controllers
- Power fail safe utilising a unique system of stored potential energy to deploy the system on loss of power.
- Fully concealed system with quality building finishes in mind
- The worlds most experienced installation team
- Full life time conditional warranty for your asset.
- 2 hour fire and smoke containment
- Fire tested in accordance with AS1530.4
- Full Life Time Conditional Warranty

100% Customer Service

Smoke Control offers obligation free technical support throughout your design and documentation stage. We are also happy to provide obligation free pricing so that you can accurately prepare your budgets

We have also prepared a complete kit for your documentation requirements. Simply download from our web site a complete set of specifications and drawings. If you would like our drawings in DWG format, simply give our technical department a call or email your request.
