Smoke Control's Full Life Cycle Service ensures that at any stage of the project – from design through to commissioning – the only company responsible is Smoke Control.

100% QUALITY

The Smokeshield - S concertina type smoke curtain is an obvious solution for protecting atriums and other large spaces and can be used in conjunction with or in lieu of mechanical smoke control measures.

Smoke Control has installed a myriad of these systems in office buildings and shopping centres throughout Australia and New Zealand.

So why the Smokeshield - S ? High quality materials and fittings make the Smokeshield - S the market leading concertina type smoke curtain.

Its design provides inherent qualities unmatched by others, meaning it will last the life of the building. Smoke Control offer a full life time conditional warranty for this system.

The original and the best;

- Complete system cycle tested for 10,000 maintenance free cycles
- High quality fittings that will last the life of the product
- Upper and lower limit settings for ease of adjustment throughout the life of the product
- Tested in accordance with EN12101.1 and BS7346.3 providing performance levels from D30 through to DH120
- Folded and stitched corners, not a flat fabric that will bunch, wear and cause irregular operation
- High quality motors tested to 50,000 fault free cycles
- The worlds most experienced installation team
- High quality CE Labelled (third party certified) controllers
- Full life time conditional warranty for your asset.

100% Customer Service

Smoke Control offers obligation free technical support throughout your design and documentation stage. We are also happy to provide obligation free pricing so that you can accurately prepare your budgets

We have also prepared a complete kit for your documentation requirements. Simply download from our web site a complete set of specifications and drawings. If you would like our drawings in DWG format, simply give our technical department a call or email your request.

We will respond the same day !
