Problem

Smoke control in a high traffic area requiring movement of bulky goods

Solution

Install Stripecoil walk through type smoke curtains to provide a D60 rating in accordance with EN12101.1 Smoke Curtains

Design Considerations

The system had to be highly reliable, sufficiently compact and unobtrusive, yet allow free movement in non-fire mode. Once deployed, Stripecoil allows up to 100 people per minute to exit through the barrier. The system self stabilises after the exit of occupants. On reset of the alarm signal, Stripecoil will retract into the “standby mode”.

*Note: Each project is unique and usually requires the involvement of a Fire Safety Engineer.
Please contact us to discuss the suitability of this solution for your project.*
